Ebola in West Africa

If you have returned from Guinea, Liberia or Sierra Leone or cared for someone with Ebola in the past 21 days

and

You have a fever or feel unwell (or have experienced either of these within the past 24 hours)

then

Without touching anyone, please tell a member of staff immediately

Ebola facts:

- the risk of Ebola to the UK public is very low
- people with early symptoms (such as fever or sore throat) are unlikely to spread Ebola
- Ebola is not spread through the air
- however, someone with Ebola can be infectious if they are suffering from diarrhoea, vomiting or bleeding
